

# The Vault of Mystery -ASSEMBLY INSTRUCTIONS-

## WHAT YOU'LL NEED:

Scissors, Elmer's glue (or a glue stick) and a ruler or other straight-edge.

**VAULT ASSEMBLY:** We'll begin by building the vault. Cut out the Vault Side Piece on page1. Fold the grey flap **DOWNWARD** and then fold **DOWNWARD** between each of the vault's six side panels. Glue the grey flap to the back of the opposite side panel, so you have a six-sided cylinder like the one shown in Figure1A. Cut out the Vault Bottom on Page2. Fold the six edge panels **DOWNWARD** and place the Vault Bottom over the bottom of the cylinder. Glue the edge panels to the vault sides as shown in Figure1B. (It's handy to insert a ruler or similar item into the vault so you'll have something to press against when gluing the edge panels.)

Now cut out the Vault Top on page2. The Vault Top has six black flaps, six grey tabs and six edge panels. Carefully cut along the red lines to separate the grey tabs from the edge panels. Fold the grey tabs **DOWNWARD** and then fold the black flaps **DOWNWARD**. Next fold the edge panels **DOWNWARD**. Now turn the piece upside down and glue the grey tabs to the backs of the adjoining edge panels as shown in Figure2A. Finish the Vault Top by folding the black flaps down over the grey tabs and gluing the black flaps to the back of the edge panels. You should now have a lid like the one shown in Figure2B. Place it over the top of the vault.

**ANSWER CUBE ASSEMBLY:** Cut out the three Answer Cubes on page2. For each cube, fold the seven black flaps **DOWNWARD** and then fold **DOWNWARD** between all six sides of the cube. We'll be gluing the black flaps to the inside of the cube to connect the sides. Start by connecting the two YES sides to the outermost NO side as shown in Figure 3A. Next connect the two YES sides to the remaining NO side. You should now have a box with a lid, as shown in Figure 3B. Place glue on the three remaining black flaps and press the DOUBTFULL side down over the flaps on the YES sides. The flap on the DOUBTFULL side should tuck inside the cube. (You can insert a pin or toothpick to press the flaps against the sides when gluing.) Assemble all three Answer Cubes in this manner. Your Vault of Mystery is now ready for use!

## DIRECTIONS FOR USE:

Place the three Answer Cubes inside the Vault of Mystery and replace the Vault Top to close the vault. Shake the vault vigorously while concentrating on any question you want to ask. Then remove the top and pour the three cubes out onto any flat level surface. The cube that lands nearest to you shows the answer to your question!

Note: The Vault of Mystery should NEVER under ANY circumstances be used inside an actual cemetery unless you think it might be kinda fun to do so, in which case I'll be looking forward to hearing how it went.
