

The Amazing Mysterious EYE OF MIDNIGHT Fortune Telling Pendulum

TO ASSEMBLE: You'll need a quarter, scissors, glue, and about a foot of thread.

Snip out the answer disc and the EYE OF MIDNIGHT pendulum. Glue the two pendulum sides over the quarter, but don't cut or glue the small rectangle in the middle (it becomes a loop). Next run one end of the thread through the paper loop and tie securely. Now tie a knot in the opposite end of the thread, about 8 or 9 inches from the pendulum. Your EYE OF MIDNIGHT pendulum is now ready for use.

(If you wish, you may glue the answer disc down to a piece of poster-board or cardboard so it lays perfectly flat)

To use the EYE OF MIDNIGHT Fortune Telling Pendulum:

You should be seated at a level table. Place the answer disc in front of you and grasp the knotted end of the pendulum string gently between your thumb and forefinger. Extend your arm forward and suspend the pendulum over the center of the answer disc, holding it about an inch above the disc. Now concentrate on the question you want answered. The pendulum may spin in the center of the board for a short while, but within 30 seconds to 1 minute, the pendulum should begin to move either in a line or a circle over the answer disc, indicating the answer to your question.

As the pendulum first begins to move, it may seem as though gravity is fluctuating around the pendulum, and this can be rather alarming. It's important to remain calm while using this device, so don't be startled when the pendulum actually starts to move. This device works particularly well at night and in candlelight.
