

COLLAPSIBLE STAKE Parts Page 1.

What You'll Need: scissors, glue and a ruler or other straight edge. A black marker is optional for darkening the fold lines.

Folding tip: It's helpful to 'score' the lines before folding. You can use an old ink pen, a knitting needle, the end of a paper clip, or any metal object that will crease the paper without tearing it. Scoring will help you fold much more quickly and precisely.

ASSEMBLY INSTRUCTIONS:

Cut out all four parts. For Part 1, Fold the gray panel **DOWNWARD** and then fold **DOWNWARD** between all four remaining panels. Glue the gray panel to the back of the opposite panel, forming a shape like the one shown above. Fold and glue Parts 2 and 3 in the same manner. For Part 4, fold the four side panels **DOWNWARD**. Now slide Part 2 into Part 1, and Part 3 into Part 2, as shown above. Place Part 4 over the end of Part 1 and glue the four side panels (on Part 4) to the matching panels at the top of Part 1. (Use plenty of glue and press gently till the glue's dry enough to hold). Your stake is now fully assembled. Gently pull the tip of the stake forward until the stake is fully extended. You're now ready to plunge the stake into someone's chest. Have Fun!
