

Flip Sticks

Print out this page. Cut out a creature (but don't separate the two panels). Fold the panels over a pencil (or a drinking straw or chop stick). Be sure the creature is centered on the pencil. Tape the sides together as shown (using clear tape). Then tape both sides of the creature to the pencil, as shown.

Hold the pencil as shown with the creature at eye level (but not too close). Rub your palms together to spin the creature and you should see an animation. (Spin too fast and it's a blur, too slow and there's no illusion. But at the right speed you should see the bat flap, the skull chatter and the zombie shamle.
